

„New Logo“

In recent years there have been various changes and innovations in the house of AB-Polymerchemie GmbH, which we like to remember back in the face of our new logo and we do not want to leave this unmentioned in this current newsletter.

The biggest change was certainly the move to our new location in Schirum in 2001, since then we have to prove day after day our quality and competence. Particularly innovative was the year 2002 in which we presented our AB-POX 460 ESD - system the first time. Since our system is a synonym for reliable, permanent ESD protection and is well known in the market as that time quality standard. The next highlight was definitely, both for customers and suppliers, our Rock Night Aurich in 2003. This musical and spiritual event is expected today in all folks be involved memory, since these are the last people known to have left it in the late morning hours.

2006: The first "yellow Technical Information" appears and gives the customers and clients a detailed overview of our product range.

2006 - 2008 were particularly influenced by our research and development department. During this time our "practically emission-free" AB-ZEROPOX and AB-ZEROPUR - product series and the AB-COR - line were launched, which represent up to date the current state of the art and already meet the requirements of tomorrow (VOC < 1 %). In particular testing institutes, clients, operators and corrosion protectors may connect the year 2010 with the term "bionics - technology". Extraordinary and for today not considered possible test results were confirmed by famous national and international institutes.

2008-2010 we have expanded our production, warehouse and office areas by another 3.000 m². All together we have now about 6.500 m² to manufacture and deliver the goods just in time.

The year 2011 also stands for more advertising, which you may take easily from our updated homepage www.ab-polymerchemie.de as well as our new logo (see above). Through the word "Coatings" in the logo we may call our product portfolio in a more appropriate designation. In the near future on all documents the old logo will be replaced by the new one.

There are many reasons for the company's success, including you, our loyal and long-term customers and suppliers, who have contributed the major part.

On this occasion we would like to say special thanks for the good and trusting cooperation.

**Greetings from Aurich.
Your East Frisian ABP-team**
